

Thalia Vaughan

BA(Hons) Architecture

Enthusiastic Part 1 architect with a 2:1 from The Arts University Bournemouth, dedicated to creating a greener and more sociable environment, by re-using existing materials within new and old architecture. Optimistic about seeking a full time placement to develop these interests with the goal of completing RIBA Part 2 and contributing to the built environment.

- 10 GCSE's A - C

Skills

- Autocad
- Model making
- Drawing
- Photoshop
- InDesign
- SketchUp
- Problem solving

Experience

FAT exhibition curation

Myself and one other student from architecture were chosen to take everyone's work from a collaborative project with Fashion and Textiles during our second year, and curate an exhibition in our university gallery for one week. This was a very rewarding experience improving my leadership skills and interaction with peers on a more professional level.

Collaborative Projects Within University

Throughout my studies in architecture I have collaborated with other architecture students, as well as those from Art, Graphics, Fashion and Textiles. Each project presented new skills while improving old ones.

The FAT Project was by far the most rewarding and enjoyable. Students from Fashion, Architecture and Textiles collaborated for one week in Poole to create something fun and informative that related to the area. Each course got to learn from the other and some of these new skills has helped to develop my work throughout the rest of my studies in architecture.

Interests

During the final 2 years of study I have become passionate about health and fitness, and in my final year I began learning Taekwondo while dancing and running, having completed my first 10K race with the intention of progressing onto a half marathon in autumn. These interests helped me to become more focused, optimistic and competitive within my university work, while improving my time management skills.
